EVIDENCE CONTINUED.

IN THE CHARGE AGAINST KING.

Crown Witnesses Continued to Occupy the Box Yesterday and this Morning.

When Supreme Court re-assembled yesterday afternoon Constable Low, Major Strickland and Sergt.-Major Emery were called and identified the bedding of the prisoner.

ALEXANDER MOOSTOOS.

The evidence of Alexander Moostoos, began before lunch, was then continued. Witness found three pieces of bone on the same day at the camp fire and gave them to his father, who put them in a tin can and took them to the house. The next day Sergt. Anderson came to the house, and he and Moostoos re-examined the contents of the can. Witness could not say what was done with the pieces of bone, nor how they came to the court. Prof. Primrose of Toronto, to whom the supposed remains had been sent for examination, was present and produced a package of four small bones sent him. Witness selected three of these as the bones he had found. The same day he had found these he had given his father a piece of bone shaped like a tooth, also some buttons.

CROSS-EXAMINED.

The witness was subjected to a vigorous cross-examination by Mr. Biggar. He admitted that on the preliminary examination he had said he saw his father put the three pieces of bone in the tin after showing them to Sergt. Anderson, and now deplored that this was the case.

He admitted having formerly said he did not know what his father had done with the bones, but now understood the question better. This explained the disagreement of his statement in evidence in chief with that on the preliminary hearing.

SERGT. ANDERSON.

Sergt. Anderson was called and identified the three bones given him by Moostoos and the one he found himself. His identification of bones did not agree with that of the previous witness, but he was very certain of the bone found by himself.

CONSTABLE REITCHIE.

Witness said he had been sent to Toronto early in January with several parcels to be delivered to Prof. Primrose. He was present during the examination of these and they were returned as far as possible to the respective wrappers or jars from which taken. These he had brought back with him and handed over to the magistrate at the preliminary examination. Several bottles, packages and jars were produced and identified as those in question.

DR. BRAITHWAITE.

Dr. Braithwaite identified the four glass jars into which he had put certain objects which he received from Constable Low on October 24.

PROF. PRIMROSE.

Prof. Primrose, professor of anatomy in Toronto University, was called and read as evidence the report reproduced elsewhere with a detailed explanatory appendix. After reading the report he verbally explained several of the technical terms used and said that as to the bones identified as the parietal and occipital bones of a human body there was no doubt. As to the other bones he could not say definitely whether human or not. There was nothing in their structure inconsistent with either theory that they were or were not human.

The sitting then adjourned until this morning.

The trial began this morning with the cross-examination of Prof. Primrose. His story here remained practically the same as he gave in direct evidence yesterday. Summed up it was, that although in his mind he was certain the skull bones found in the camp fire were human, nevertheless, they might have been found in different mammals. In the blood test the results were not what would be expected if the blood were human, yet this might be accounted for in two ways, viz.: the test would not work out if the blood had been heated above 55 degrees centigrade, or if by any means formalin had been used in the preserving of the specimens. Either of these instances might have occurred or on the other hand the blood might not have been human. The witness declares the hair found in the clot of blood on

GOOD AGENTS FOR THE
Oliver Typewriter
IN ALL
UNOCCUPIED TERRITORY

Over 100,000 of these machines have been sold in the U.S. within the last few years at the same price which is being charged for any other standard typewriter. This proves conclusively that the OLIVER is the very best machine made regardless of price.

As there is now in Montreal a factory devoted exclusively to the manufacture of this machine, it can be bought in Canada for the same price at which it is sold in the U.S. without adding from \$25 to \$30 to cover duty and charges, as do all the other standard writers.

This should be a very attractive proposition to any purchaser of writing machines.

PARLIAMENT

Quiet and Slow

Proceedings in the Commons have been slow and of minor interest since the presentation of the Autonomy Bills on Tuesday. Most of the time has been occupied in pushing interests and a fair measure of progress has been made.

Judge Killam Again

On Thursday the appointment of Judge Killam to the chairmanship of the Railway Commission was again discussed. Mr. McLean objected to the appointment of Judge Killam to the chief-commissioner on the ground that the promotion of judges was a vicious principle. Considering that the appointment, and the arrangements for superannuation connected with it, remove Judge Killam permanently from the Bench, it does not seem that Mr. McLean's objection is well taken. It is admitted on all hands that Judge Killam is eminently fitted for the position, and that as a judge he has not only been above suspicion, but has shown the greatest ability. The country certainly needs the best man it can get in the position of Chairman of the Railway Commission and there seems to be a "general agreement" that Judge Killam is the best man available. Mr. McLean's contention received a very limited support.

Importance of the West Recognized

The discussion in the Ontario papers on the Autonomy Bill is almost entirely confined to the school feature. The financial terms are considered liberal, and are accepted as being fairly measured by the present and future requirements of provincial government in the new provinces. The change in eastern opinion regarding the value of the territories during the past two years is most marked. Today it is accepted everywhere that the success of the west is the success of the Dominion, that without western success there cannot be eastern progress. It is this feeling, which has been steadily growing for the past few years, that has made it possible for the Government to deal as it has dealt with the new provinces. In '96, and for several years after, the name of the West could scarcely be mentioned without provoking unfavorable comment in the House and in the press. It is a good thing for the Dominion at large that at last the interdependence of west and east is recognized. So far as comment has yet gone it is remarkable how such an important measure has been launched with so little criticism on every point. The provisions of the bill have been taken for granted and some of the cartoons in eastern newspapers, which are not too favorable to the Government, are of a congratulatory nature.

Manitoba's Grievs

It is hoped, however, by the Opposition press to arouse antagonism in Manitoba on the plan that that province has not been duly considered in the division of territory and in the territories on account of the separate school restriction. Telegraphic reports of the editorial expressiveness of western papers appear in the eastern press, and when these fail, special correspondence by wire is invoked. But if Manitoba's boundaries and subsidies are not as they should be the responsibility rests, as Sir Wilfrid pointed out, on his predecessors rather than upon himself. It would be strange doctrine that would restrict his dealings with the new territories to the limits laid down by his predecessors in their dealings with Manitoba.

Separate School Provisions

In regard to the separate schools provisions, the North West has had separate schools ever since it has had a government. Neither from the government nor from the people has there come any objection to the system as it exists. The North West Assembly and government on several occasions memorialized the Dominion in regard to provincial rights, but on no occasion did they voice any objection to the restrictions on the

school system then prevailing. This being the case the Government of the Dominion is scarcely open to blame for not making a provision which no one had called for.

Printing Bureau & Slow

The Autonomy Bill is not yet printed officially, but what purports to be an exact copy of the Saskatchewan bill has appeared in the Ottawa "Citizen." This gives food for discussion, but until the official bill appears it is not possible to discuss decisively its provisions. In the meantime, the Opposition leaders are sharpening their axes and getting ready for the debate on the second reading, which will take place, if not next week, the week after. Until then their line of attack will not develop.

Minister of Interior Returns

The Minister of the Interior appeared in the House last night for the first time this session. He appears to have recovered from the indisposition which was the cause of his lengthy and regrettable absence. The Minister of Finance is still on the ocean, but is expected to arrive early next week.

Still Hard After a Duty

A strong and persistent effort is being made by the lumber interests to secure a duty of \$2.00 per thousand on rough lumber. Until this year the British Columbia and north-western Ontario mills were the only ones pressing for this duty, but this year they have been joined by the eastern Ontario mills and it is difficult to predict the result.

BULLETIN CO. (Ltd.)

Our city has good water but good water can be made better, and Ross Bros. Ltd. have the thing to do it with. Have you seen their "Noxall Filter." It is the simplest Filter on the market, the most thorough and by a long way the cheapest. Any family can afford one and they are made either for pressure to attach to your city water tap or gravity to filter from a pail or crock.

Following is one of the many testimonials that speak of the work done by these Filters:

The Duquesne Chemical Laboratory.

Analitical Chemists and Chemical Engineers, Standard Bldg.,

531 Wood St. Pittsburg, Pa., April 12, 1897.

GENTLEMEN:—Following is the report on the samples of water taken from the regular city supply, and also after it had passed through the Tripoli filter. Two filters were tested in this manner one having just been started and the other having been in use four months. The chemical analysis, made to show animal and vegetable pollution, includes the amount of ammonia, albuminoid ammonia and oxygen required to completely destroy such pollution. The bacteriological analysis is a count of the total number of living microbes in ten ordinary drops of water. This test was repeated in duplicate in case of the filtered samples. The results obtained on analysis as follows:

Water from hydrant. From old filter. From new filter.
Ammonia 0.03 0.02 0.02
Albuminoid Ammonia 0.20 0.09 0.08
Oxygen Consumed 1.64 0.56 0.64

The figures represent parts of the impurities in one million parts of water. On cultivation, the hydrant water showed 890 bacteria in ten drops. That from the old filter 0, 2 and 4 in three tests, and from the new filter 3, 3 and 7. The above shows that the number of living microbes present has been reduced 99.6 per cent.; the ammonia is reduced 39 per cent.; the albuminoid ammonia 57 per cent., and the oxygen consumed 64 per cent. by passing through the filter, making the originally very bad water equal in cleanliness and purity to the best spring water. These results cannot be surpassed by any system of filtration with which we are familiar.

Respectfully submitted,

W. E. GARRIGUES CHIEF CHEMIST AND MANAGER.

99.6 per cent. of living microbes eliminated by use of the filter.

The price is from \$3.00 up, the \$3.00 one fits on to any house tap and can be removed in two seconds. They are stone Filters and the stones can be cleaned as easily as any glass tumbler or delf cup. The Gravity filters are only \$4.50 and readily filter water from a pail into any other vessel placed to receive the filtered water. They are small and can be easily packed in a very small space to carry from place to place.

The above is correct cut of the Gravity Filter, showing it in operation.

These Filters can only be had in Alberta from ROSS BROS., Ltd. Sole Agents. The Trade supplied.

ROSS BROTHERS, Limited.

HUMAN BONES**FOUND AT THE CAMP FIRE**

A portion of the exhibits of supposed remains identified as human

Following is the complete report of Prof. Primrose read in supreme court yesterday.

Toronto, Feb. 25th, 1905.

"The articles in question were delivered to Prof. Primrose by Constable Otto Rietschel, R. N. W. M. P. on Monday, Jan. 9th, 1905.

"The articles were accompanied by a list and described as indicated in the appendix attached to this report. The Following Materials were examined.

1. Bone—Many fragments of bone were found. These have been carefully measured and described and were studied with the object of determining whether or not they were human. All the fragments were charred and had evidently been subjected to great heat. Most of the fragments were too small for identification but some bore characteristics which enabled one to say what they were.

(a) Human Parietal bone. Four pieces of bone were from the roof of the cranium and when placed together their broken edges fitted accurately and then constituted a piece of bone 5 cm x 7 cm in size. The piece of bone thus constituted is clearly the upper posterior portion of the right parietal bone of a human skull.

(b) Human Occipital bone. A portion of bone which is found to correspond in shape and size to the jugular process of the occipital bone of a human skull.

(c) Head and glenoid cavity of the scapula. One cannot say whether this is human or not.

(d) Of the other fragments some were from the skull and some from the long bones of the skeleton whilst others were from other parts, but none of these fragments could be identified as human.

2. Soft Parts.—Four glass jars contained materials immersed in fluid containing formaline. Whilst this material was charred on the outside for the most part yet one was able to get a sufficiently large piece from the interior which had not been greatly altered by the heat. Microscopic sections were made and these stained in eosine and haematoxylin and examined. The following articles were thus identified:

Lung, stomach, oesophagus, liver, aorta, striated muscle fibre, pancreas, heart muscle. One of the glass jars contained a piece of the thoracic aorta 5 cm. long. All of these tissues resembled human structure under the microscope but one could not say positively that they were human.

3. Blood Stains.—Four envelopes contained pieces of bedding with material supposed to be blood. In three of these one was able positively to identify blood. The existence of blood was established by the following tests:

(1) Red sanguines under the microscope.

(2) Haemin crystals present.

(3) The spectroscope of reduced haematin was obtained. The precipitation test gave negative results and therefore afforded no information of value as to whether or not the blood was human.

4. Hair.—In one piece of the bedding there was a piece of blood clot containing hairs partly embedded in the clot. These hairs were examined under the microscope and were found to resemble human hairs. These hairs were about 1.5 cm long and were of a reddish brown color, some of them were very light in shade.

AWFUL BUTCHERY

IN FIGHTING AROUND MUKDEN

Japanese Occupy Large Portion of the Russian Former Position.

Bulletin Special.

London, March 4.—The Japanese are steadily driving the Russians from their positions along the Shinko, who are doggedly fighting in frightful rear guard action in the midst of a blinding snow storm and bitter weather. The losses on both sides are terrible and are numbered by thousands. The Japanese have occupied nine miles of the Russian right position.

Mukden, March 4.—Ceaseless artillery fire is heard coming nearer and nearer the city. The train of wounded is streaming through the city. Great excitement prevails; every means of transportation out of Mukden is being used. The Japanese are using immense bodies of infantry in night attacks, the men throwing hand grenades with frightful effect. The butchery is awful.

Opposed to School Clause.
Bulletin Special.

Brandon, March 23.—The Presbyterians have sent a strong resolution to Parliament asserting that separate schools are detrimental to national life and that national schools bring all denominations under common educational influences. The protest was strong against imposing limitations on the prospective provinces, which their people are not consenting parties.

The Grand Orange Lodge has concluded its sessions. A feature of the gathering was the adoption of a strong resolution opposing the educational clause. Winnipeg Grand Lodge also exchanged telegrams with the Grand Lodge of the Territories now in session at Regina on the same subject and adopted a resolution commanding Mr. Sifton's resignation.

Jas. Ayre M. P. P. was re-elected Grand Master, Mayor Sharpe Deputy. Regina Grand Lodge also adopted similar resolutions and wired them to Laurier, Sproule and Hauau.

Wesley College students likewise wired Sifton commanding him on his action on Territorial school clause.

Insists on Fire Protection.

Bulletin Special.

Fort William, March 2.—Over fifty buildings will have to be removed as a consequence of the city council tonight insisting on proper fire protection.

Britain's Navy in Good Shape.

Bulletin Special.

London, March 2.—A memo to the navy estimates issued tonight shows that the fleet was never in a more perfect state of repair and manoeuvred to the world that England's navy is ready for all emergencies.

Liberals Retain Seats.

Bulletin Special.

Toronto, March 3.—The decision has been given whereby the Liberal members for Prince Edward and West Huron retain their seats. The Conservative candidates pay the cost of litigation.

Novelist Coming West.

Bulletin Special.

New York, March 3.—Rider Haggard the famous novelist has arrived to study conditions in North Western Canada with a view to the adoption of the same methods in South Africa. He comes here as British Land Commissioner.

Sunlight Soap

ENTER PROTEST

AGAINST THE SCHOOL CLAUSE.

Indian Head People in a Public Meeting Adopt Resolution.

Bulletin Special.

Indian Head, March 4th.—At the call of the mayor the citizens assembled last night to discuss the Autonomy Bill. It was decided to deal with the school question only and to be strictly non partisan. Addressers were equally opposed to interference with the rights of the new provinces.

The following was the resolution read by the president of the Local Association and unanimously adopted:

"Indian Head town and district in public assembled have learned that the bill now before Parliament involves re-enactment of the separate school systems of the new province.

We desire to register an emphatic protest against such enactment by Parliament is calculated to arouse strife throughout the Dominion with reference to a matter that belongs entirely to the new province;

is an invasion of provincial rights since the principle and spirit of confederation involves the right of every province to control its own educational affairs;

that it is a violation of the principle of the separation of church and state; a principle we hold inviolate and that is will provoke discord and tend to defeat the great purpose of public school education, namely the promotion of unity and harmony among the diverse elements and classes.

We desire moreover to protest most emphatically against any legislation whatever by the Dominion that will in any way restrict our full and absolute control of our own educational system, whether that legislation means continuation of the present system or any other alternative that may be proposed since we hold that the Federal authorities have no right to dictate in the slightest degree what our educational system shall be."

Copies of this resolution are to be forwarded to Premier Laurier and Mr. Sifton.

EVIDENCE CONTINUED.

Continued from page one

King's bedding was of a reddish hue. By asking Henry Hayward, the brother of the missing man, the reporter learned that Edward Hayward's hair was black. Dr. Primrose also stated that if he took any one of the specimens shown him alone, he could not say that it was positively human. But having all together he is certain they are.

Dr. Braithwaite "now took" the stand and testified to having received the specimens identified from Constable Low, as told in his story and to having preserved them in glass jars with the assistance of Drs. Hislop and Wilson who were both called to testify and simply corroborated the story told by Dr. Braithwaite. MacEach, however, gave evidence to the fact that they believed the bones shown them to be those of a human but were not sufficiently acquainted with the bones of other animals to be certain that the same might not have been possessed by some brute.

An Indian named Francois Kisenis was next called and had but taken his place with the interpreter beside him, when everyone's attention was suddenly attracted to the jury box from which came a rather stifled moan, heard throughout the court-room. There sat one of the jurors, Mr. Christopher Carruthers, of Sturges, with fixed, glassy eyes. The courtroom was cleared at once and the sick man was laid down at once and the doctors present endeavored to restore him to consciousness, explaining the case to be an epileptic convolution.

The court was adjourned until two o'clock this afternoon when it was again adjourned until Monday at 10 a.m.

GRANTED A DECREE

BUT NOT CONSTITUTION NOR ASSEMBLY

The Czar tries to relieve the situation by a limited concession.

Bulletin Special.

St. Petersburg, March 4th.—In the presence of Ministers and the Emperor the Czar has affixed his signature to a rescript containing a decree giving elected representatives of the people an opportunity to express their views on the presentation and enforcement of law. It is however neither a constitution nor a national assembly.

London, March 4th.—The Russian Emperor's manifesto, with the defeat of his army in the Far East is looked on with gloomy forebodings by English and European papers.

Warsaw, March 4.—Regiments of troops and squadrons of Cossacks are occupying the cities. The weathered classes are pouring into Austria. The agitation among the peasantry is spreading and ugly rumors are ripe of Polish regiments revolting at the front.

No Solution Yet.

Bulletin Special.

Ottawa, March 4.—No solution of the cabinet difficulty is yet announced. Mutual concessions have been offered, but an agreement is not yet reached. Today's cabinet council will probably decide.

The death of E. F. Clarke, M. P. for Toronto, caused the adjournment of the house last night. Death resulted from pneumonia. He was editor of the Ontario Sentinel and a strong and valuable man in the house and country.

Clarke M. P. Dead.

Bulletin Special.

Toronto, March 4.—E. F. Clarke, M. P. for Centre Toronto, died suddenly tonight of heart failure. He was a prominent Conservative leader, a big Orangeman and labor leader.

B. C. Interference

Bulletin Special.

Victoria, B. C., March 4.—A petition has been passed around the local house and signed by the members of the government and private members protesting against the separate school clause in the autonomy bills.

MEDICAL MEN MEET.

The regular monthly meeting of the North Alberta Medical Association was held in the council chamber last evening. Dr. Foria read a paper on Septicemic which was well discussed. Prof. Primrose was elected an honorary member of the Association. He afterwards addressed the gathering to the gratification of the members.

TRAINS

Seven killed and Thirty-Five injured
in a Pennsylvania wreck.

Bulletin Special.

Pittsburg, March 4.—In a rear end collision between two passenger trains going to Washington, seven were killed and thirty-five injured. The first train stopped on account of a hot box and the second ran into it. The Ohio engineer corps was on board. The commanding officer was fatally injured.

A CHARITABLE
ENTERPRISE.

The following chain letter has been received by Mrs. Josephine H. Desilets, Provincial Commander, Ladies of the Maccabees. It explains itself and Mrs. Desilets wishes to call the attention of not only the Knights and Ladies of the Maccabees but all other Fraternalists as well.

St. Louis, Mo., Feb. 21st, 1905.

I am requested by the National Fraternal Sanitorium for consumption to ask if you contribute to an emergency fund a ten cent piece or more, sending it direct to their St. Louis office and then duplicate this letter to three or more of your friends, thus doing your part in an endless chain of charity.

Five thousand dollars are needed immediately to transport the \$90,000 Temple of Fraternity from the Worlds Fair Grounds, St. Louis to New Mexico, where as a gift from the fraternal world it will serve as the Administration Building of a Mammoth Consumption Colony. Every ten cent piece received assists in the care of the unfortunate consumptives regardless of greed or affiliation, of whom there are ten million in this country. The Fraternal Sanitarium will eventually be supported by the allied fraternal and religious organizations of the country. The Emergency Fund is needed, pending the passing of appropriations.

All inquiries gladly answered and your donation will be promptly acknowledged by the Emergency Fund, National Fraternal Sanitorium, Chemical Buildings, St. Louis, Mo.

Fraternally yours,

CHAS. F. HATFIELD,
General Secretary.

FIRE DISCOVERED THIS
MORNING

Fire was discovered at an early hour this morning in one of the rooms of the Imperial hotel and extinguished before any considerable damage was done. The bedding and mattress on the bed in the room were badly burned, and if not discovered in time the results might have been serious.

The Big Store

A SHOE STORY

Owing to the immense stock we carry it is impossible to give any definite idea of the qualities and values we offer in any single advertisement. Except we charter the newspaper. We therefore intend to talk about one or two lines each week.

Keep an eye on our Shoe Space. It will contain interesting news. Also, don't fail to see our Shoe Stock. It is our business to show you, and the confidence we have in our stock makes it a pleasure to show it. Your visit will be time profitably spent.

The ART SHOE for Ladies

This is the debut of this shoe in Edmonton and it is up-to-date in every particular. The prices of this line range from \$2.75 to \$6.00. The colors are Champagne Willow and Black in both Oxfords and Bals.

The soles this season are lighter, turns and McKays being most popular. The heels are smaller as a rule, but we have both styles in this line.

You'll want a fine shoe before long. Don't buy it without first seeing

HUMAN BONES.
Continued from page three

5 Metallic Substance.—A piece of metal was sent for analysis. It was thought that possibly this was the amalgam filling of a tooth. On chemical analysis it proved to be zinc.

The examination of the various articles has resulted in the positive identification of human remains in certain of the bones, namely the upper posterior portion of the right parietal, the sacrum and the jugular process of the occipital bone of the left side. All the other materials examined are identical in structure with that which may be found in the human body but one cannot assert positively that they are human."

Comment on Cabinet Trouble

Winnipeg, Mar. 2.—Mr. Sifton's resignation as Minister of Interior, in Premier Laurier's cabinet upon the question of sectarian schools has set the prairie afire metaphorically speaking. The Grand Orange Lodge spoke in the master's address last night. The Presbytery of Winnipeg sent a strongly worded protest to Premier Laurier and the House of Bishops Anglican, who yesterday elected Bishop Matheson to the archiepiscopal see of Rupert's Land, has also passed a dignified resolution protesting against interference in the educational system of the provinces.

From a western point of view there is danger of precipitating racial trouble between English and French and an acrimonious religious row between Protestants and Catholics. All papers here this morning commend Mr. Sifton's stand. The Free Press this morning says, "The situation is critical no doubt, but its seriousness might be exaggerated. It ought to tend itself to adjustment and settlement if there is a sincere desire on both sides to reach an agreement." Sifton's proved devotion to Liberalism, his well-known admiration for Premier Laurier makes it clear that in separating from the Government he is actuated by no other motive than a desire to save the Liberal party from making a mistake." Undoubtedly if the Government is so ill-advised as to "undertake to pull through the educational clause in its present form, Mr. Sifton will oppose it to the best of his ability, and in that case, he will speak for a wider area than the sparsely peopled areas of Western Canada, but we cannot conceive Sir Wilfrid Laurier persisting in urging the educational clause. The person or company staking a claim must add a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10, royalty at the rate of two and one-half per cent. on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free mineral shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same claim may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notices and paying fee of \$2.00. A claim may be abandoned and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate of work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent; it is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent. of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unopened land for agricultural and building purposes.

Petroleum—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected an area of 640 acres. Should the prospectors fail to cover all by paying quantities, and satisfactorily establish such discovery an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of Interior, Ottawa, September, 1903.

JAMES A. SMART
Deputy Minister of the Interior,
20 12 05

A free miner, having discovered mineral in place, may locate a claim 4,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 may have been expended or paid to the locator may, upon having a survey made, and upon complying with other requirements purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N.W.T., excepting the Yukon Territory—Placer mining claims are generally 300 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan River claims for either bar or beach, the former being 160 feet long and extending between high and low water mark. The latter includes bar diggings but extends back to the base of the hill or bank but not exceeding 1,000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the Rivers of Manitoba and the N.W.T., excepting the Yukon Territory—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark, on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent. collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by a position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must add a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10, royalty at the rate of two and one-half per cent. on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free mineral shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same claim may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notices and paying fee of \$2.00. A claim may be abandoned and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate of work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent; it is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent. of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unopened land for agricultural and building purposes.

Petroleum—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected an area of 640 acres.

Should the prospectors fail to cover all by paying quantities, and satisfactorily establish such discovery an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

JOINT COUNCIL MEETING.

Contributed

The council for District 26, T. 4 and 27, T. 4, met at Sprucegrove on Monday in joint session there being a full attendance of members of both councils, and considerable business was transacted.

Walter Bristow received the appointment of Secy-Treas. for the current year.

The By-Law passed at the last meeting of the council to borrow \$100 was rescinded and motion carried that By-Law No. 1, authorizing the chairman and treasurer to borrow \$100 from the Merchants Bank, be passed and signed by council together with the necessary note.

Each councillor was authorized to act as steward in his division of the district. It was also decided that the councillors be paid for their services at the rate of \$2 per day and mileage at the rate of ten cents per mile.

Motion carried that the joint councils urge the Government to grant the request contained in petition forwarded to Regina in February, 1904, as to the proper reorganization of Districts 26, T. 4, and 27, T. 4, in accordance with the boundaries laid down in the petition, and the secretary was instructed to correspond with Pehr Lake District asking the co-operation of their council in regard to such reorganization of districts, and requesting them to write to the Government endorsing the action of this joint council.

The secretary was also instructed to write to the Government requesting a grant of one thousand dollars to be expended on 4th base line, between townships 52 and 53 range 25 w. 4, and further grant of one hundred dollars required to build a bridge across Dog Creek on 14th base line between townships 52 and 53 range 27 w. 4.

This concluded the business of the joint council and the meeting adjourned.

WINTERED AMONG THE FOOTHILLS

Mr. H. Colder a timber inspector who has spent the winter in the foothills of the mountains west of the city reports that he has travelled every day from December 1st. Only two severe storms were encountered and those not severe enough to prevent travelling. The course of the party enabled them to thoroughly explore the great region lying between Edmonton and the mountains and Mr. Colder is convinced that a great future awaits that district when it is accessible by railway. There is considerable open country even among the foot-hills, plenty of timber and water.

Mr. Colder spent fifteen months in Northern Labrador, and coming out last spring met Hubbard of the Outing Magazine en route to the interior where he afterwards starved to death.

The Canadian Northwest Homestead Regulations

Any even numbered section of Dominion Lands in Manitoba or the Northwest Territories, excepting 1 and 23, which has not been homesteaded, or reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age to the extent of one quarter section, of 160 acres more or less.

ENTRY.—Entry may be made in the district in which the land to be taken is situated, or, if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him. A fee of \$10.00 is charged for a homestead entry.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required by the provisions of the Dominion Lands Act and the amendments thereto, to perform the conditions connected therewith, under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of this Act, resides upon a farm in the vicinity of the land entered upon by such person as a homestead, the requirements of this Act, as to residence prior to obtaining patent, may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his homestead, or a certificate for the issue of such patent,

Buy Your Flour Now!

"This is the advice we give to our numerous customers and to the public in general"

Buy Your Flour Before It Gets Higher!

We are selling Flour too cheap at present! Still, our loss is your gain. And remember, it is bound to go up.

Stop and Consider!

Wheat has reached the \$1.06 mark in Winnipeg, \$1.19 1-2 in Minneapolis, and American millers are buying all the Canadian western wheat they can get hold of for milling purposes. The farmers of the Northern States have their eyes turned on this side of border to get their seed wheat. The last item alone means about five millions of bushels. All this will certainly influence the price of wheat, consequently the price of bread stuff.

Do Not Hesitate - - Do not Delay

Our general stock of groceries is complete in all lines and all fresh goods. We invite you to try our new lines of Ceylon. Just arrived from the Ceylon Gardens. No need to praise it in the cup. Remember our motto:—"Small margins. Big turn over."

Revillon Brothers, Limited**We Will Buy**

A 50c. Bottle of Liquozone and Give it to You to Try.

We want you to know about Liquozone, and the product itself can tell you more than we. So we ask you to let us buy you a bottle—a full-size bottle to try. Let it prove that it does what medicine cannot do. See what a tonic it is. Learn that it does kill germs. Then you will use it always, as we do, and as millions of others do.

This offer itself should convince you that Liquozone does as we claim. We would certainly not buy a bottle and give it to you if there was any doubt of results. You want those results you want to be well and to keep well. And you can't do that—nobody can—without Liquozone.

Every homesteader who fails to comply with the requirements of the homestead laws is liable to have his entry cancelled, and the land may be again thrown open for entry.

Application for patent should be made at the end of three years before the local agent, sub-agent, or Homestead Inspector. Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

Information.—Newly-arrived immigrants will receive at the Immigration Office, in Winnipeg, or at any Dominion Lands Office, in Manitoba or the Northwest Territories, information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing land to suit their full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

W. W. CORY.
Deputy Minister of the Interior.

N.B.—In addition to Free Grant Lands to which the regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from railroad and other corporations and private firms in Western Canada.

At all high-grade grocers.

Fever—Gall Stones—Tumors—Ulcers
Gout—Sciatica—Varicose Veins—Diseases
All diseases that begin with fever—all inflammations—all catarrhs—all contagious diseases—all in nervous debility—Liquozone acts as a stimulant, accomplishing what no drugs can do.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you, to show you what Liquozone is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever.

Liquozone costs 5c. and \$1.
